

Xperi Announces DJI Osmo Pocket Camera Gimbal to Feature FotoNation Technology

November 29, 2018

DJI integration expands FotoNation portrait enhancement technology into new product category

SAN JOSE, Calif.--(BUSINESS WIRE)--Nov. 29, 2018-- [Xperi Corporation](#) (Nasdaq: XPER) ("Xperi") is pleased to announce that an advanced portrait enhancement technology created by its wholly owned subsidiary, [FotoNation](#), will be featured in the DJI Osmo Pocket camera gimbal, available worldwide on November 28, 2018. FotoNation's solution, together with DJI, the world's leader in civilian drones and aerial imaging technology, will usher in a new generation of handheld camera stabilization systems.

The DJI Osmo Pocket brings to market the most refined portrait enhancement technology to be deployed on handheld and desktop devices. The easy-to-use retouching capabilities will enable users to create studio-quality portraits with the touch of a button.

"We always enjoy working with like-minded brands such as DJI to continuously search for innovation and differentiation," said Christopher Lang, general manager of Xperi China. "With this cooperation, we are equipped to explore new and unique uses for FotoNation's portrait enhancement technology."

FotoNation's feature-rich portrait enhancement technology brings selfies to life by enabling the capture and retention of realistic skin textures, as well as consistent preview and capture, to ensure a seamless editing process.

"We are excited to work with Xperi to bring to market the first handheld camera gimbal with a portrait enhancement feature," said Paul Pan, senior product manager at DJI. "FotoNation's technology is amazing, and we are eager to see what our customers think of the product."

FotoNation is a global leader in providing computational imaging, computer vision and facial analytics solutions. Its technologies have enhanced the digital imaging capabilities in more than 3.3 billion devices. FotoNation offers scalable software and hardware solutions in a flexible architecture to ensure its customers can build intelligent imaging capabilities into their devices. These capabilities enable devices to combine low-power, high performance and state-of-the-art functionality that deliver outstanding user experiences.
